

Test Equipment Solutions Datasheet

Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as spectrum analyzers, signal generators, oscilloscopes, power meters, logic analysers etc from all the major suppliers such as Agilent, Tektronix, Anritsu and Rohde & Schwarz.

We are focused at the professional end of the marketplace, primarily working with customers for whom high performance, quality and service are key, whilst realising the cost savings that second user equipment offers. As such, we fully test & refurbish equipment in our in-house, traceable Lab. Items are supplied with manuals, accessories and typically a full no-quibble 1 year warranty. Our staff have extensive backgrounds in T&M, totalling over 150 years of combined experience, which enables us to deliver industry-leading service and support. We endeavour to be customer focused in every way right down to the detail, such as offering free delivery on sales, presenting flexible technical + commercial solutions and supplying a loan unit during warranty repair, if available.

As well as the headline benefit of cost saving, second user offers shorter lead times, higher reliability and multivendor solutions. Rental, of course, is ideal for shorter term needs and offers fast delivery, flexibility, try-before-you-buy, zero capital expenditure, lower risk and off balance sheet accounting. Both second user and rental improve the key business measure of Return On Capital Employed.

We are based at Aldermaston in the UK from where we supply test equipment worldwide. Our facility incorporates Sales, Support, Admin, Logistics and our own in-house Lab.

All products supplied by Test Equipment Solutions include:

- No-quibble parts & labour warranty (we provide transport for UK mainland addresses).
- Free loan equipment during warranty repair, if available.
- Full electrical, mechanical and safety refurbishment in our 40GHz in-house Lab.
- Certificate of Conformance (calibration available on request).
- Manuals and accessories required for normal operation.
- Free insured delivery to your UK mainland address (sales).
- Support from our team of seasoned Test & Measurement engineers.
- ISO9001 quality assurance.

R6243/6244
DC Voltage Current Source/Monitor

Optimal for Evaluating Electronic Circuits (Parts) with Flexible Source and Measurement of DC Voltage and Current

R6243/6244

R6243/6244 is a DC voltage and current source/monitor with wide ranges of generation and measurement.
R6243: Voltage = 0 to ±110 V, current = 0 to ±2 A
R6244: Voltage = 0 to ±20 V, current = 0 to ±10 A
The R6243/6244 provide high accuracy with a setting resolution of 4 1/2 digits and a measuring resolution of 5 1/2 digits, a variety of sweep functions and a pulse measuring function for the minimum pulse width of 1 ms. The R6243/6244 can be used a power supply in many applications such as for test system, for evaluations of semiconductors and other electronic parts in R&D, etc.,

	R6243	R6244
Maximum output current	±2 A at up to ±32 V ±1 A at up to ±64 V ±0.5 A at up to ±110 V	±10 A at up to ±7 V ±4 A at up to ±20 V
Voltage source/measurement range	320 mV to 110 V	320 mV to 20 V
Current source/measurement range	32 µA to 2 A	320 µA to 10 A

- Voltage source and current measurement (VSIM)/ Current source and voltage measurement (ISVM)
- Voltage source and voltage measurement (VSVM)/ Current source and current measurement (ISIM)
- Sink enabled bipolar output
- Minimum pulse width: 1 ms
- Linear, logarithmic, and random sweep functions for characteristics tests
- Limiter (compliance), oscillation, overload, and overheat detection functions
- Synchronous operation function by combining two R6243/6244s or more
- GPIB for automatic measuring system

Source and Measurement Functions

Voltage source/current source and voltage measurement/current measurement can be selected.

R6243/6244

Source Modes

The R6243/6244 has four source modes – DC, pulse, DC sweep, and pulse sweep. The sweep can be selected three types of mode such as linear, log, and random (arbitrary waveform generation by user programming).

Mode	DC	Pulse
Continuous Spot		
Linear Sweep		
Log Sweep		
Random Sweep		

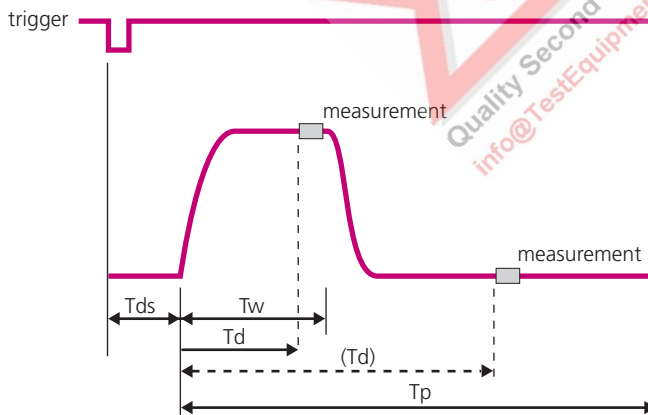

The R6243/6244 can generate a pattern for a device test without exchanging data with an external controller. Further it can read out measurement results from the memory after the test.

Note: The pulses across polarities cannot be generated.

Source/Measurement Timing

In pulse and sweep modes, the source and measurement timings are synchronous and the measurement is permitted after a specified time from trigger.

Setting the measure delay (Td) permits a measurement after a specified time from the end of the pulse such as stress tests.

Tds: source delay
Tw: pulse width
Td: measure delay
Tp: period

Range Switching without Discontinuity

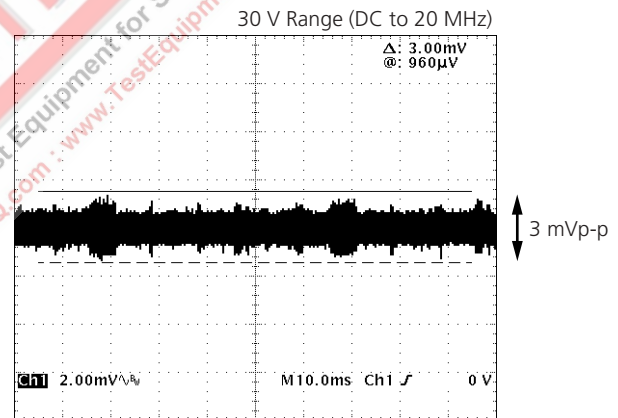

The voltage and current source ranges can be changed without lowering the output to zero from the level before switching. This allows no discontinuity at the output and reduces adverse effects on devices with hysteresis or high dielectric constant.

Range Switching without Lowering the Output to Zero

Low Noise

The basic requirements for power supply performance are accuracy of the voltage/current source and measuring against the noise added on the output voltage/current. The R6243/6244 has a minimum-noise design effective for the case susceptible to power noise and input signals of DC amplifier. The R6243/6244 is the perfect power supply for a linear IC, optical device, or mobile communication amplifier.

Output noise of R6243/6244

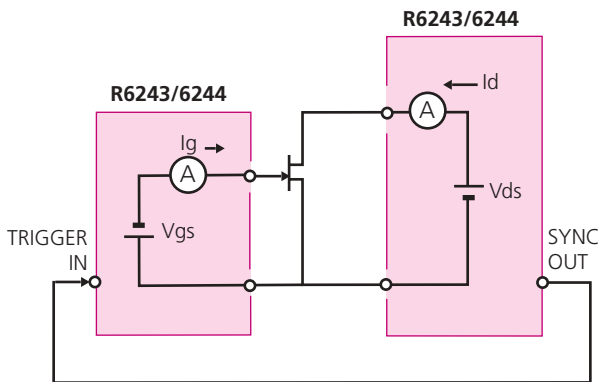

Output noise of our conventional models

For a transistor, FET characteristics test

In a transistor or FET characteristics test, two units of R6243/6244 can be used for simultaneous measurement. The R6243/6244 controls the generation timings of the drain and gate voltage to protect a device from stress. It can measure I_d and I_g simultaneously.

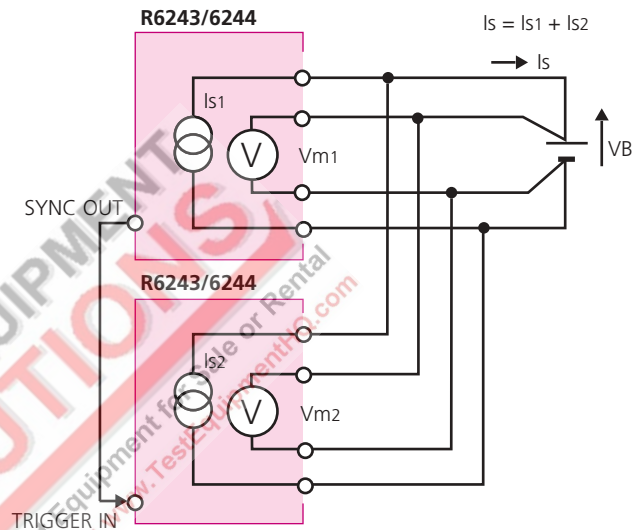

- Linear, log, and random sweep functions
- Pulse measurement (minimum pulse width: 1 ms)
- Measure delay function for measurement timing control
- Source delay function for generation timing control

For a battery charge and discharge test

The R6243/6244 is available for a battery charge and discharge test at constant current (CC) or constant voltage (CV) by DC or pulse applications. For a pulse charge and discharge test, measurement is necessary while and after the pulse application. Two units of R6243/6244 can be used in parallel operation for measurement at the above two points and to increase the current capacity up to 20 A.

- Source sink current up to ± 20 A (7 V)
- 20 A (R6244) and 4 A (R6243) by two units in parallel operation
- Measurement at pulse HI/LO point
- Selection of voltage or current measurement

For a temperature dependency test of diode Vf

In a characteristics test on a power diode, applying a pulse current is effective for avoiding the influence of self-heating. The current pulse sweep function and the pulse-synchronous voltage measurement ensure accurate Vf characteristics test at a large current.

Current pulse sweep ISVM

Temperature Dependence of Vf by Pulse Width Variation

For a dark current characteristics test of photodiode

The following functions of R6243 are effective for photodiode characteristics test:

- Dark current – reverse voltage characteristics test function using the 100 pA resolution
- Breakdown voltage measurement by ±110 V source and comparator

DC voltage sweep VSIM

Temperature Dependence of the Dark Current – Reverse Voltage Characteristic

For a DC/DC converter characteristics test

The following functions are effective for DC/DC converter characteristics test:

- Simultaneous measurement of input current and output voltage/current by using two units of R6243/6244
- Electronic load operates even at 0 V (General electronic loads do not operate at 0.8 V or less)
- Large output current up to 10 A (7 V) (R6244)

Synchronous Measurement of Input Current and Output Voltage

Specifications

All accuracies are guaranteed for one year when used at temperatures of $23 \pm 5^\circ\text{C}$, relative humidity 85% or less.

Voltage Source: $\pm 0.003\%$ of range or less For maximum load at 4 wire kelvin connection.

Current Source: By CMV ($A \times V_o/1 V$) of the total accuracy.

Output Resistance: For 2 wire connection. However output cable is not included.

Maximum Load capacitance: Maximum load capacitance with no oscillation during voltage source or voltage Limiter operation.

Range	Output Resistance		Maximum Load Capacitance
	Voltage Source	Current Source	
32 μ A	500 m Ω or less	1 x 10 ⁹ Ω or more	1 μ F
320 μ A	100 m Ω or less	1 x 10 ⁹ Ω or more	1 μ F
3.2 mA	10 m Ω or less	1 x 10 ⁸ Ω or more	100 μ F
32 mA	10 m Ω or less	1 x 10 ⁷ Ω or more	100 μ F
320 mA	10 m Ω or less	1 x 10 ⁶ Ω or more	2000 μ F
2 A/3.2 A	10 m Ω or less	1 x 10 ⁵ Ω or more	2000 μ F
10 A	10 m Ω or less	1 x 10 ⁴ Ω or more	2000 μ F

Standard attached cable resistance: 100 m Ω or less

Maximum Inductive load:

Maximum inductive load with no oscillation during current source or current limiter operation.

Current Source Range	32 μ A	320 μ A	3.2 mA to 10 A
Current Limiter Range			
Maximum Inductive load	100 μ H	500 μ H	1 mH

Source/Measurement Functions

DC Source/Measurement:	DC voltage, current source/measurement
Pulse Source/Measurement:	Pulse voltage, current source/measurement LO value of Pulse is the same polarity as the HI value.
DC Sweep Source/ Measurement:	Source/Measurement by Linear, Log, and Random
Pulse Sweep Source/ Measurement:	Source/Measurement by Linear, Log, and Random LO value of Pulse is the same polarity as the HI value.
Sweep mode:	Reverse ON (2 way)/OFF (1 way)
Sweep Repeat Times:	1 to 1000, Infinite
Number of Sweep Maximum Step:	5000 step
Random Sweep Maximum Memory:	5000 data
Measurement Data Buffer Memory:	5000 data
Calculation Functions:	NULL calculation Comparator calculation (HI/GO/LO)
Trigger Method:	Automatic Trigger (DC free run/Pulse repeat) Source/Measurement by external trigger
Output Terminal:	Front; Safety Socket HI OUTPUT, HI SENSE, LO OUTPUT, LO SENSE DRIVING GUARD (For R6243)
Maximum Input Voltage:	R6243; 110 V peak MAX (Between HI-LO, DG-LO) 1 V peak MAX (Between OUTPUT-SENSE) (Between HI-DG) R6244; 500 V peak MAX (Between LO-FRAME) 20 V peak MAX (Between HI-LO) 2 V peak MAX (Between OUTPUT-SENSE) 250 V peak MAX (Between LO-FRAME)

General Specifications

Operating environment: Ambient temperature; 0 to 50°C
Relative humidity; 85% or less (no condensation)
In the case of R6244, the ambient temperature is between 0 to 40°C at the following output range.

$$0 \text{ V} \leq V_o \leq 7 \text{ V}; I_o \geq 3/7 V_o - 10 \text{ [A]}$$
$$-7 \text{ V} \leq V_o \leq 0 \text{ V}; I_o \leq 3/7 V_o + 10 \text{ [A]}$$

V_o ; Output Voltage [V]
 I_o ; Output Current [A]

Storage environment: Ambient temperature; -25 to +70°C,
Relative humidity; 85% or less (no condensation)

Warmup :

60min. or more
(until the specified accuracy is reached)

Display:

5 x 7 dot matrix fluorescent character display

Power supply:

AC 100 V/120 V/220 V/240 V (switchable by user)

Option No.	Standard	OPT. 32	OPT. 42	OPT. 44

Standard accessories

Power cable	A01402
Input/output cable (Red and black safety cable, 1 m)	A01044

Accessories (Optional)

Test fixture	R12701A
Test lead (1m)	A01041
Input/output cable (Red and black safety cable, 1 m)	A01044
Alligator clip adaptor	A08532
Banana chip adaptor	A08531
Rack mounting set (EIA, Twin, with Front handle)	A02710
Rack mounting set (JIS, Twin, with Front handle)	A02711
Rack mounting set (EIA, Twin, without Front handle)	A02720
Rack mounting set (JIS, Twin, without Front handle)	A02721
Rack mounting set (EIA, Single)	A02469
Rack mounting set (JIS, Single)	A02269
Side joint kit (4U, Twin)	A02641
Sliding rail set	A02615

For R6243

Input/output cable (4-wire banana-Alligator clip, 1m)	A01023-100
Input/output cable (4-wire banana-banana, 1m)	A01038-100

For R6244

Input/output cable (4-wire banana-banana, 0.5m)	A01047-01
Input/output cable (4-wire banana-banana, 1m)	A01047-02
Input/output cable (4-wire banana-banana, 1.5m)	A01047-03
Input/output cable (4-wire banana-banana, 2m)	A01047-04
