

Agilent 85038 and 11906 Series 7-16 Calibration and Adapter Kits

Product Overview

Modern wireless communication systems require high-performance components offering low VSWR and low intermodulation distortion at high transmit power levels. To meet these needs, 7-16 connectors are becoming increasingly common in base station transmitters, amplifiers, duplexers, and other products. These connectors conform to IEC 169-4, DIN 47223, European standard EN 122190, and British standard BSEN 122190.

To calibrate our network analyzers for measurements of devices with 7-16 connectors, Agilent Technologies offers the 85038 family of calibration kits with precision 7-16 standards. The 11906 family of adapter kits is also available to provide connections between 7-16 connectors and type-N, 3.5 mm, or 7 mm connectors. The female 7-16 connectors in these kits feature special retracted threads that do not compress the gasket when connecting to a general-purpose 7-16 connector. This allows the connectors to be properly mated with only 20 in-lbs (1.6 ft-lbs) of torque, instead of the usual 18.5 to 22 ft-lbs of torque, reducing the possibility of damaging the test ports of a network analyzer.

Agilent 85038 Family Calibration Kits

The 85038A calibration kit contains open circuits, short circuits, and terminations with both male and female 7-16 connectors. More economical versions of this kit are available: the 85038M contains only male devices, and the 85038F provides only female devices (see the following table). Each kit contains a floppy disk with the calibration kit definition for use with Agilent 8712, 8714, 8753, 8719, 8720, 8722, and 8510C network analyzers.

Table 1. Contents of 7-16 Calibration Kits

Description	Part Number	85038A	85038M	85038F
Open circuit, female	85038-80002	■		■
Open circuit, male	85038-80003	■	■	
Short circuit, female	85038-80004	■		■
Short circuit, male	85038-80005	■	■	
Termination, female	85038-80006	■		■
Termination, male	85038-80007	■	■	
7-16 adapter, female-to-female	11906-80016			■
7-16 adapter, male-to-male	11906-80015		■	
Calibration kit data disk	85038-10001	■	■	■
Torque wrench	8710-2175	■		
Open-end wrench	8710-2174	■		

Agilent 11906 Family Adapter Kits

The 11906 family consists of four adapter kits:

11906A 7-16 to 7-16 adapter kit

Contains:	Quantity	Part Number
7-16 male-to-male adapter	1	11906-80015
7-16 female-to-female adapter	1	11906-80016
7-16 male-to-female adapter	2	11906-80017

11906B 7-16 to 50-Ohm type-N adapter kit

Contains:	Quantity	Part Number
Type-N male to 7-16 male adapter	1	11906-80007
Type-N female to 7-16 female adapter	1	11906-80008
Type-N female to 7-16 male adapter	1	11906-80009
Type-N male to 7-16 female adapter	1	11906-80010

11906C 7-16 to 7-mm adapter kit

Contains:	Quantity	Part Number
7-mm to 7-16 male adapter	2	11906-80012
7-mm to 7-16 female adapter	2	11906-80013

11906D 7-16 to 3.5-mm adapter kit

Contains:	Quantity	Part Number
3.5-mm male to 7-16 male adapter	1	11906-80002
3.5-mm male to 7-16 female adapter	1	11906-80005
3.5-mm female to 7-16 male adapter	1	11906-80004
3.5-mm female to 7-16 female adapter	1	11906-80003

Specifications

Frequency coverage: dc to 7.5 GHz (usable to 8 GHz)

Nominal impedance: 50 ohms

Calibration Kits

Component	dc to 4 GHz	4 to 7.5 GHz
Open circuits	$\pm 1.0^\circ$ from nominal	$\pm 1.25^\circ$ from nominal
Short circuits	$\pm 0.6^\circ$ from nominal	$\pm 0.85^\circ$ from nominal
Terminations	Return loss >40 db	Return loss >36 dB

Adapters

7-16 to 7-16 adapters: Return loss >38 dB (VSWR <1.025)

7-16 to 50 ohm type-N adapters: Return loss >36 dB (VSWR <1.03)

7-16 to 7-mm adapters: Return loss >36 dB (VSWR <1.03)

7-16 to 3.5-mm adapters: Return loss >34 dB (VSWR <1.04)

Agilent Technologies' Test and Measurement Support, Services, and Assistance

Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent's overall support policy: "Our Promise" and "Your Advantage."

Our Promise

"Our Promise" means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When

you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

Your Advantage

"Your Advantage" means that Agilent offers a wide range of additional expert test and measurement services, which you can purchase according to your unique technical and business needs. Solve problems efficiently and gain a competitive edge by contracting with us for calibration, extra-cost upgrades, out-of-warranty repairs, and on-site education and training, as well as design, system integration, project management, and other professional services. Experienced Agilent engineers and technicians worldwide can help you maximize your productivity, optimize the return on investment of your Agilent instruments and systems, and obtain dependable measurement accuracy for the life of those products.

By internet, phone, or fax, get assistance with all your test and measurement needs.
